Party Held For Honor Students of School

A very nice party was held in the Opera House on Friday afternoon, June 12th, in honor of the Honor Students of the Public School, numbering 118 scholars. This record out of an average enrollment of 515 for the year, speaks volumes for the work and efficiency of Principal J. O. Hickson and his staff. Another item of particular interest was the fact that a number of students had completed two grades in one year, and had passed both with honors, this being worthy of particular mention.

The entire student body of the Public School attended the party, and filled the main auditorium of the Opera House, with the Honor Students seated in front. With such a large crowd of boys and girls there was of course some confusion, but the children behaved themselves very nicely and are to be complimented on their good order.

Principal J. O. Hickson conducted the program, and on the stage with him were Reed Kirkham and T. O. King, a member of Raymond's School Board and President of the Albert-Truett's Association. The program was furnished almost wholly by the pupils and was as follows:—

Singing "O Canada" by the congregation.

Speech of Welcome by J. O. Hickson who complimented the Honor Students on the progress they had made and their splendid reports. Speaking of the requirements of an Honor Student he said that marks alone were not the only requirements, in conjunction with the marks made, the attitude of the student toward his work for the year, the regularity of attendance at school and punctuality were taken into account, so that when a Honor Certificate was presented to a pupil, the teachers felt that the student receiving it was measuring up and preparing for useful citizenship in his community.

A Piano Solo — Jure May.
Reading — Olive Brandley.
Tap Dance — Gladys Strong.
Piano Duett — Karl Alred and Duane Wiggill.
Reading — Franklin Smith.
Piano Solo — Eva Cope.
Vocal Trio — Hazel Dewey, Irene Litchfield and Malin Smith.
Vocal Sketch — Mildred Boyson and Lila Walton.
Piano Solo — Margaret McBride.
Dance — Gladys Strong and Nola O'Brien.
Piano Duett — Irene Redd and Afton Christensen.

T. O. King then addressed the Students. He stated that the fact that students were passing their grades more evenly in regards to age was a nice thing and augured well for the system, and the teachers, and that the great majority were now leaving the Eighth Grade at around fourteen years. The Honor Students were fortunate in passing without examinations and received their diplomas as a reward of diligence. These Honor Students should realize that this Certificate stands for more than just getting through a Grade, and they should carry out the high ideals of Honor throughout life, as only in a life of service could we prove worthy of an Honor Certificate. To the Students not the Honor Roll the speaker said, "Do not be discouraged. Conditions may have been such that this thing is unavoidable. Carry on and get on the Honor Roll next year." Then to those who may be unable to pass their grade this year Mr. King said, "Do not be discouraged, there is no disgrace in failure, the only disgrace is in remaining a failure." He urged all to improve on their opportunities and make themselves successful and capable to carry on.

Mrs. Winnie Everson and Muriel Webster sang a Vocal Duett, following which the Honor Certificates were presented in the following order:—

Grade I Students of Miss Meldrum's room.
Grade I Students of Miss Page's room.
Grade II and III Students of Miss Johnson's room.

Grade III Students of Miss James room.
Grade III Students of Miss Powne's room.
Grade IV Students of Miss Webster's room.
Grade IV and V Students of Miss Leather's room.
Grade V Students of Miss Hickson's room.
Grade VI Students of Miss McMullen's room.
Grade VII Students of Miss Lamb's room.
Grade VII Students of Mr. Kirkham's room.

Miss Irene Redd, and Miss Afton Christensen were then presented with gift packages for their assistance to the staff in playing marches for the Students to march in and out of school.

The singing of the National Anthem brought the program to a close.

Quite a large number of adults were present to hear the program and all thoroughly enjoyed the numbers and proceedings.

About Conducting Examinations

Board of Trade Special Meeting

A Special Board of Trade Meeting is called for Monday night, June 22nd, at 8 p.m. in the Town Hall to hear Committee reports and arrange details of the Dominion Day celebration. A full attendance is requested, and the Committee Chairmen are especially asked to be present.

Remember, 8 p.m. Monday in the Town Hall.

Raymond Wins One and Loses One

Two ball games have been played here the past week, the local team winning one and losing one.

Friday night Magrath was here and Raymond won by a good margin, pounding 3 pitchers for 15 hits. Webster pitching for Raymond held the visitors to 5 scattered hits.

Monday night New Dayton was here and won the game with a 9-8 score in 9 innings. VanOrman and J. Strong pitched for Raymond and R. Skeith for New Dayton. All the players were in good form.

News Notes

Final arrangements are now made and the work on the Municipality's link between Raymond and Welling will be started at once. It needs to be said that Dominion Day is not very far away and we want good roads for that day.

Speakers at the First Ward Sacrament Meeting Sunday evening were Mrs. Dureau Weaver, who spoke of conditions and a me of her experience in Chicago, and Elder Clifton Hardy who gave a talk on the need of a Church Organization and the need of Authority in that organization. Miss Nellie Hickson, and Co. rendered a Vocal trio. All the numbers were greatly enjoyed.

Thumb Sketches

Competition

SOMEONE said that competition is the life of trade. Maybe it is at that. Anyway, during this period of world-wide depression the people of almost every country seem to be under the spell of a sort of competition fever. Maybe, too, that this spell is the result of some kind of subconscious attempt to relieve unemployment.

Down in the United States they are sitting it out in trees, harassing their sales in dancing marathons and disfiguring their faces in the fistic arena. Over in Europe both men and women are stretching their nerves and risking their lives in flying competitions over uncharted jungles and dangerous seas, swimming the channel and parachuting from the clouds.

Canada, too, under the same spell, is rushing pell-mell to "keep up with the Joneses." Her big undertaking, the World's Grain Show of 1932, is tempting the competitive spirit of every farmer of every class by stretching before his eyes the greatest aggregation of cash awards ever offered. Fancy, twenty-five hundred dollars for forty pounds of wheat. Human flies are taking the short cut over Canada's north land to the eastern hemisphere. But one of the funniest competitions yet reported is that originating in the East, and the stakes are well worth while. Listen!

It appears that after an eccentric barrister of Toronto the Good Lad passed on to the better world beyond, his will was found to provide for an award of half a million dollars to the woman who became the mother of the greatest number of children within ten years. Mrs. B., so says the report, at the age of thirty-seven, the mother of twenty children, all born in Canada, was leading for a time. Now another Mrs. B., who is but five years older is in the lead for the big money. She has twenty-six children to her credit, five of which have been born since the barrister's death in 1926.

Competition may be the life of trade and incidentally it may be the life of the nation as well.

News Notes

SUBSCRIBE to the RECORDER.

The Honor Students of the Public School were dismissed Monday. Parties were held in some of the rooms.

W. H. Gaetz is on his holidays from the Canadian Bank of Commerce, his vacation commencing Monday, June 15th.

Mr. Irving and his Arcadians played for a dance in the Prince of Wales Hotel at Waterton last Wednesday night. A good time was had by the large crowd who were there to the Board of Trade meeting, representing all of Southern Alberta. The Arcadians are playing a return engagement at the Waterton Pavilion on Saturday night.

Birthday Party Is Held

A most pleasant and enjoyable evening was spent at the home of Mr. and Mrs. Charles Huddle on Monday evening last making it the One Hundred and Forty Fifth anniversary as their birthdays are close together.

Refreshments were served to about twenty four guests, and music and singing enlivened the time. Short addresses were given in honor of the host and hostess, with a hope that they may both live to enjoy many more birthdays. Some very pretty cards and mottoes were presented to them, which was much appreciated. A beautiful birthday cake was made for the occasion by Mrs. Dewey.

Mrs. H. S. Allen Mrs. Gordon and Mrs. Paek presented the guests of honor with beautiful flowers.

The following were present:—
C. R. Wing and wife, Heber Allen and wife, W. B. Naider and wife, D. Evans and wife, Mr. Nilsson and wife, Mesdames H. S. Allen, L. Paek, John Poulson, G. Hovey, J. Mahew, G. Gordon daughter from Calgary, C. Winter daughter and W. W. Dewey and daughter.

Examinations are of little value if they are not scrupulously fair and honest. The present management of our schools have exerted themselves in the past, aiming to ensure strict honor at examinations.

During the past several years teachers from the public school have presided over high school students writing while teachers other than grade eight teachers have presided over grade eight writing. There have been notwithstanding stories started by high school students to the effect that some have cheated in the high school. These stories might have had some slight foundation in fact, but those most able to judge, declare that the examinations in Raymond are conducted with such care as is not to be surpassed anywhere in the Province.

There are several disgusting notices found in some students' and others which cause them mischievously to misrepresent conditions. What may have been the cause of the above mentioned stories, the educators of our schools are determined to remove as far as is humanly possible, all grounds for suspicion.

In the past the Department regulations have been religiously kept. This year there will be in addition constant vigilance in every examination room two teachers, one public school teacher and one high school teacher, and a grade eight teacher as a witness. This arrangement is a precaution to protect the honor of the students from slanderous tongues and also to protect the community and its schools against anything ending to mar the spotless reputation which should be enjoyed by Raymond. Anyone who hears directly or indirectly of such a thing should report it to the Department.

An open air Band concert will be held in front of the Broadway Store Saturday night at 8 p.m.

Any irregularity should report the matter with names of the guilty. Elder Board members or staff members will earnestly welcome any information. Raymond people cannot afford to allow any irregularity to go on.

CAMERAMEN ASK THEIR LIVES IN FILMING "WHITE PERIL"

Don't fail to see this remarkable film, which is coming to this Theatre Monday and Tuesday.

The terrifying sweep of the avalanches down the mountain side, the death-defying stunts of an aviator, slipping by in a racing tempo close to mountain walls.

The descent into a glacier three hundred feet deep. The fight on the ledge below which is an abyss of veritable depth. Don't fail to see this wonderful show.

Mr. and Mrs. M. T. King and Mrs. T. O. King were among the Lethbridge visitors from Raymond on Saturday last.

Bitter Taylor is hauling gravel on the new road.

George Laycock and son Ralph were in Raymond for Band Practice on Sunday.

Health Service

OF THE Canadian Medical Association

Edited by GRANT FLEMING, M.D., ASSOCIATE SECRETARY

We know as much about diphtheria as we do about any other disease, in fact, we may know more. We know the germ that causes diphtheria; we know how the disease is spread from one person to another; we know how to cure the disease providing treatment is given promptly on the first day, and, lastly and most important of all, we know how to prevent diphtheria.

We are indeed in the happy position of possessing the knowledge which would enable us to overwhelm diphtheria and to make it one of the rarest diseases. We are in a position to annihilate one of the foes which, for generations, has menaced human life and left a trail of damaged bodies in its wake.

To know this is one thing, but to take the necessary action is another. We know how to prevent diphtheria, but just because we have this knowledge, we will not cause diphtheria to disappear. Diphtheria will disappear when we make use of what we know and not before.

There is a substance called diphtheria toxin. When this substance is injected under the skin, it stimulates the body to produce the forces which enable it to overcome the poisons which diphtheria germs give off. After a certain number of injections—usually three are sufficient—given at a certain interval, the person injected is protected or immunized against diphtheria.

It is a simple, harmless way of securing protection against a disease

which is responsible for about nine hundred deaths each year in Canada. What all those who are responsible for the care of young children should know is that diphtheria can be prevented. But everyone should understand also that diphtheria will not be prevented unless each child is given the necessary injections of diphtheria toxin whereby he is immunized or protected.

The responsibility rests with parents. The method of preventing diphtheria has been discovered; everyone is being told about it. The family physician is ready to give the injections. In many places, the Health Department furnishes the diphtheria toxin. All of this is of no value, however, unless each parent or each person responsible sees to it that his own child or each child under his care is protected.

Diphtheria is a disease which occurs early in life. It is not safe to delay in having children immunized. This should be attended to before the end of the first year, but even if your child is more than a year old and has not as yet received the necessary injections, they should be given without delay.

It is urged upon all parents not to delay in having their young children immunized. When that has been done, we can say not only that diphtheria CAN be prevented, but that it HAS BEEN prevented.

THE NEW SYSTEM OF RECOMMENDING

This year, throughout the Province of Alberta, the Staffs of the Public and High Schools will be faced with the responsibility of recommending the School Pupils of Alberta from Grade VIII to Grade IX, from Grade IX to Grade X, and of recommending two subjects from Grade X to Grade XI. One question that arises is, "Do the teachers fully realize the magnitude of the responsibility that is now upon their shoulders?"

We do not want to imply the idea that we lack confidence in the ability of the teachers, nor in their intentions. It is not with this idea at all that these few words are written. In this recommending of Students from Grade to Grade there is the whole future of the pupils schooling to consider. We were discussing this system with one of our teachers recently, and pointing to a now successful teacher, he said, "There is a victim of the recommending system, and it took him years and years to overcome the setback he received." And in further conversation we were told that the future scholastic achievements of many students had been entirely ruined because of a lack of foresight and a lack of appreciation on the part of the teachers in recommending their students. Over anxious to bestow a favor and give a student a chance and actually putting up a barrier that this student was never able to overcome.

We would not like to be accused of minimizing the efforts of a scholar, nor of believing wholly and solely in examinations as the only basis of promotion. We are heartily in favor of the Honor System and the Recommending System, but if a pupil is going to be promoted to a higher grade when he or she is not qualified to undertake the work of that Grade, then we say a thousand times better to have an examination, than to send this student to the higher grades without the Ground work that alone can spell success in more advanced work. As an example, would you consider it a favor to put a boy or a girl of yours in a high-powered, intricate, and expensive car and tell him or her to go to it, when you knew he did not understand the fundamentals of safe driving. What would you expect? Could there be anything but disaster? In just the same sense, we set the stage for disaster for our boys and girls when they are promoted before they have mastered the work of their present grade. There are of course various things that enter into this

idea of large percentages in passing, but we shall not attempt to discuss them. They hardly come within the scope of this article.

There, is however, one other point. As parents, how are you going to feel about it if your neighbor's child is recommended from the grade and your own boy or girl is asked to remain and take the year's work again. There is a terrible strain of fault-finding and ignorant criticism in the make up of humanity. We hope we shall not have to stop any bricks or stones, or other missiles because of this statement. It is only natural that as parents, we should be interested in, and jealous of our boys and girls accomplishments, we would hardly be worthy of the name parents if this were not so. At the same time this jealousy should not dull our vision. It should not lead us to criticize until we have gained possession of all of the facts of the case, and never should it lead us to criticize in the presence of our children, for when we do this we sow the seeds of discord and strife.

It is unavoidable that in this recommending there will be a great many surprises and not a few very keen disappointments. Who then is the best judge of a pupil's ability to go on and take up another year's work, the teacher or teachers who have been in daily contact with the student, or the parent who sees the child a few hours of the day, and if he or she is like the great majority of parents, seldom if ever takes the time to look up the teacher and inquire concerning the progress of the student. What kind of a story regarding attendance, attitude, conduct, and general average does the monthly report show. How has the marks of the pupil been in preceding years? Has there been anything in this year's work in the way of illness, faulty vision or anything of this sort that may have been a deterrent to the success of the pupil?

All of these things have their bearing on the success of the children in their school work. If they miss one, two or three weeks in the year, they break into the continuity of the work, and it requires a great deal of personal work to overcome this loss, and it must be said to our discredit, that too few of our boys and girls appreciate the opportunity of schooling sufficiently to force themselves to work it by any chance they can slip by without it.

If dissatisfied at results, we beg of you consider these things, go to the Principal and discuss the question honestly and openly with him, and then ask yourself the question, "Which is best, another year now, or a discouraged and unsuccessful student for the rest of his or her school years. Every effort will be made to keep up the high standards of Raymond's schools. This system may give an opportunity for us to hook up closer with our School Teachers to the everlasting benefit of our boys and girls. Let us try it.

S. I. May was a Cardston visitor on Wednesday night of this week.

Thumb Skelch's Nail By Cy

A Hayseed

THERE was a time, even within the memory of many who are now living, when the chap who made a living by tilling the soil was popularly known as a country hayseed. His coat was cut in ancient style, his trousers were pants of the high water type, and his boots were cowhide through and through and looked it. His shirt was of homespun, his collar—but he wore no collar—his headgear in summer was of straw from the oat stalks of the field he cultivated and in winter of fur pieces cut and sewed together from the home tanned skin of the very calf whose head he soured into a pail of sweet milk to force upon its simple brain a knowledge of drinking milk respectably before its natural time. Tradition says, moreover, that with the seeds and chaff of ripened hay still sticking in the shoulders of his home-made, full-cloth coat, he sat in the front seat—there were no pews then—of the corner's church on Sunday mornings. A hayseed! A country hayseed!

But the world moves—we were nearly going to say forward, but we'll leave it at that—and the country rube of the old days moves with it. He has learned that his business is not only among the most honorable but that it is among the most highly scientific in the world. He has gained respect and attention as the years roll by. Men of other occupations have learned a thing or two, also. Each knows that his prosperity or lack of it reflects the conditions of farming. Herein lies the reason why there is a practically unanimous interest in and support of the greatest World Exhibition and Conference ever held at any time, a friendly competitive exhibition of the best grain and seed that the best growers in the world are able to produce, a conference of practical farmers and scientific experts from all over the world, to take place at Regina in 1932.

In addition the farmer has, with his fellows, organized gigantic co-operative business agencies. He leads effective political battalions in every country. From the premier's bench on "the floor of the 'Ouse,'" as the veteran and respected Langley, of Saskatchewan, would say, he addresses Mr. Speaker, another tiller of the soil. He's an agronomist or an agriculturist, certainly a bit pinched just now, but he's doing as well as the other fellow. He'll wiggle out of his difficulties some day. He's done it before.

News Notes

Mrs. D. G. Selman was in Lethbridge
last Saturday, visiting her son Fran-
cis at the Hospital.

William Wright, age 25 of Chate-
hain, met instant death on Thursday
evening last when a Ford Coupe he
had just purchased skidded and turned
over in the gravel breaking his
neck and bruising him badly about
the neck and shoulders. The compan-
ion who was with Wright, Julius Ed-
lung, escaped without a scratch.

NEW HEALTH KNOWLEDGE

Scientific study has shown that
fish flesh and broth are more effec-
tive than meat and meat preparations
in stimulating the secretion of gastric
juice, the digestive fluid of the human
stomach, and now it has been estab-
lished by Dr. S. A. Komarov, through
research carried on at the fisheries
biological station at St. Andrew's, N.B.
that fish skin and skin broth are ev-
en more powerful than fish flesh or
broth in this regard. Dr. Komarov's
discovery is a valuable addition to sci-
entific knowledge as to means of stim-
ulating or diminishing gastric secre-
tion. The St. Andrew's biological sta-
tion is one of four scientific centres
conducted by the Biological Board of
Canada under the authority of the
Minister of Fisheries.

VITAMINES FROM CANADA

Canada's exports of cod liver oil,
which is especially valuable from the
health standpoint because of its high
vitamine content, totalled 172,423 gal-
lons in 1930 an increase of almost 8,
000 gallons over the 1929 figures. The
United States was the chief buyer.
Canadian salmon are rich in Vitam-
ine D. content. That's one reason why
they are so valuable in the diet.

WHO'S WHO

(By Gee)

F. Hedley Auld

MR. F. HEDLEY AULD, Deputy Minister of Agriculture for Saskatchewan, is chairman of the Exhibition Committee of the World's Grain Exhibition and Conference and, like many other prominent westerners, was born in Prince Edward Island. He came to the West some twenty-eight years ago and in 1906 joined the Dominion Department of Agriculture, becoming associated with W. A. Wilson in the dairy branch.

A year later Mr. Auld organized the statistical bureau of the Provincial Department of Agriculture and afterwards went to Saskatoon to take charge of the agricultural extension work of the University. For a short time he was a member of the Mooney Seed Company and in 1914 returned to the Provincial Department of Agriculture, organizing the debt adjustment bureau. In 1916, when the late Frank Mantle, then Deputy Minister of Agriculture, went overseas, Mr. Auld became acting deputy and deputy upon the death of Mr. Mantle.

For the past two years, Mr. Auld has been president of the Regina Provincial Exhibition Association. In 1928 Mr. Auld was secretary of the Royal Grain Inquiry Commission. He is a director of the Regina Y.M.C.A., and has membership in the Canadian Society of Technical Agriculturists, the Saskatchewan Live Stock Board, and the Saskatchewan Stallion Board.

TENDERS FOR SCHOOL HOUSE

PROVO S. D., NO. 825

Sealed Tenders will be received by the Board of Trustees of the above school district at the office of the Secretary-Treasurer up to noon of June 30th, 1931, for the erection a one (1) roomed frame school building after Plan No. 63-C 881. Plans and specifications may be obtained from Secretary-Treasurer on payment of a deposit of \$5.00. Plans must be returned within 24 hrs. and deposit will then be refunded. A marked cheque for five per cent. of the amount of tender must be enclosed with each tender as a guarantee that same is BONA FIDE. No tender will be considered without this cheque attached. The lowest or any tender will not necessarily be accepted.

N. W. PETERSON,
Secretary-Treasurer.
Box 181, Raymond, Alta.
Provo School District, No. 825.
Nearest Station, Welling.
Miles Distant, 1 1/2.

A large number of Raymond people were at the U.F.W.A. Conference in Lethbridge on Saturday.

Mr. Manion, organizer for the International Lions Club was in Raymond on Tuesday of this week.

The Greyhound busses commenced calling here Friday of last week. Their station is at the Maple Leaf Bakery, and they arrive from Cardston at 9:38, and arrive from Lethbridge at 6:52 p.m.

NO BREAD LINE ON THE FARM

(Wetaskiwin Times)

When a spell of hard times hits us
With a smash between the eyes,
When the whole world looks so gloomy,
Not a star shines in the skies;
Day by day we're getting poorer,
Future fills us with alarm,
Let's sit down and just be thankful
There's no bread line on the farm.

When our clothes get worn and faded
And no mon to purchase more,
When our pocket book is empty
And the wolf howls at the door;
There may be some compensation,
Life may still hold quite a charm,
Livin' way out in the country,
There's no bread line on the farm.

Have some more cream on your oat meal,
Plenty milk, drink all you please;
Don't be stingy with the butter,
Pass around the cottage cheese.
Ham and bacon in the skillet,
Plenty beef and pork to roast,
Plates heaped high with golden muffins,
And delicious graham toast.

Home grown wheat in all our baking,
Home grown corn meal in the mush,
Cellar filled with spuds and cabbage,
Onions, carrots, beets and such.
Baked potatoes in the oven,
What a sight for hungry eyes,
Oh, such sauerkraut and spareribs,
Home made mince and pumpkin pies.

Though our prices be demoralized,
And we must economize,
Though prosperity's abolished,
Not for long, we realize;
Though 'tis hard to pay our taxes,
There's no reason for alarm,
Let's go to work a singin'
There's no bread line on the farm.

News Notes

Mr. and Mrs. D. L. Gilbert were in Nobleford over the week end.

Mrs. I. M. Coombs of Cardston is spending the week here with her daughter Mrs. C. Litchfield.

Mrs. S. I. May and daughter June were in Cardston the first part of this week.

The mercury reached 98 in the shade on Monday. Tuesday was also sultry.

A passing shower on Tuesday evening left rain and hail in its wake. Luckily the hail was not swift enough to do any damage.

The Municipal Council had a session on Tuesday, the road question being the principal issue. The thing seems pretty well settled now and a definite announcement will be made next week.

Lee Brewerton and L. D. King were in Waterton Park Wednesday and represented the Raymond Board of Trade in the Banquet in the Prince of Wales Hotel that evening. They also advertised Raymond's Big Celebration for Dominion Day.

Barnwell had a rather severe electrical storm last week. It burned out one transformer, and in another home broke an electric light globe in a baby's room scattering the glass all over the room. No fatalities or other serious damage was reported.

Here and There

Annual value of forests products in Canada is placed around \$500,000,000 by the Canadian Government Forestry Service, and over 200,000 persons are employed in this work.

Total value of crude bullion gold in Ontario for the first two months of 1931 is placed at \$6,517,251 as compared with \$5,352,395 for the same period of 1930, an increase of nearly 22%. If this continues, all previous records of gold output are likely to be exceeded this year.

Position of president of the Boy Scouts Association of Canada has been offered to and accepted by E. W. Hearty, chairman and president of the Canadian Pacific Railway, whose interest in boy welfare has long been recognized all over the Dominion.

John Minard, section hand with the Canadian Pacific Railway for many years and pensioned at the age of 73, celebrated his 105th birthday April 2. He does not use glasses, eats well, sleeps well and enjoys life. He has no prescriptions for exceeding the century mark.

Sponsored by the Alberta Motorcycle Association, the Western Canada Motorcycle hill-climbing championships will be decided at Banff in the Canadian Rockies on May 24 and will be followed the same day by the Banff annual regatta.

A shipment of 300,000 salmon eggs has recently been forwarded to the Dominion Fish Hatchery at Flat Lake, Restigouche, Canada to receive treatment prior to being deposited in the Nipisiguit River as a part of the 1931 programme for restocking New Brunswick fishing waters.

Canadians, from coast to coast, heard the voices of His Excellency the Governor-General and Rt. Hon. R. B. Bennett, prime Minister of the Dominion, May 11, in endorsement of the work of the Canadian Red Cross, through stations linked by the radio broadcast transmission system of the Canadian Pacific Railway Company's Telegraphs.

In the last analysis the railroad safety movement's success is traceable largely to teamwork. Each railroad worker is constantly reminded that safety is paramount. Safety practices have become habitual, therefore they do not lessen efficiency. Railroad passenger service is now more efficient as well as safer than ever before, says a prominent United States newspaper.

Shipping of all kinds between and leaving Canadian ports has increased 60 per cent. in the last five years. Total net tonnage, exclusive of coasting, for year to March 31, 1930, was 89,138,789 tons. To this must be added net tonnage of 8,100,000 tons for vessels entered and cleared coastwise.

A gold-headed cane was presented by the Montreal Harbinger commission to Captain A. Freer, master of Canadian Pacific Steamship Duchess of Richmond, on the occasion of the first arrival of the season at Montreal of a trans-Atlantic liner. The Duchess of Richmond reached port April 19.

Increased tourist traffic to Canada from the United States is fore-shadowed by reports from Canadian Pacific passenger agents in the U. S., which show a much larger number of enquiries from would-be travellers than in former years. C. B. Foster, passenger traffic manager of the railway, stated recently in an interview at Saint John.

PROVINCIAL INSTITUTE OF TECHNOLOGY

We are in receipt of a bulletin of information on the work done at the Provincial Institute of Technology, Calgary. This is issued by the management on behalf of the students with the desire of assisting these young men to find jobs.

The unemployed are with us from time to time, but the unemployable are our most serious menace. Anything that we can do to find work for men who have the initiative and perseverance to spend time and energy

in equipping themselves for special lines of useful work should be done. The young man attending the Technical Institute is one of many drawn from all parts of the Province and represent the hard-working and forward-looking element in our population from which the best citizens of the coming generation will be developed. The bulletin describes nine different line of work in which training is given and is well illustrated. We commend the effort being made to bring the job to the man and to bring the right man to the job.

Dr. J. H. Grisdale

DR. J. H. GRISDALE, B.Agr., D.Sc.A., Deputy Minister of Agriculture for Canada, is chairman of the Conference and Programme Committee of the World's Grain Exhibition and Conference and in this capacity is charged with one of the most important phases of the 1932 world-wide event.

Born at St. Marthe, Quebec, in 1879, the son of farming parents, Dr. Grisdale entered the Ontario Agricultural College at Guelph in 1896, and was an under-graduate student until 1907. He completed his studies at the Iowa State College and graduated in 1898 as a Bachelor of Agriculture.

Returning to Canada in 1899, Dr. Grisdale was given charge of the important position of agriculturalist at the Central Experiment Farm at Ottawa. In 1911 he became director of the Dominion Experimental Farms.

Practical knowledge of farming, technical training and a keenly analytical mind are the qualifications that make Dr. Grisdale the logical head of the Federal department experimental farm branch, the largest system in the world devoted to agricultural practice, investigations and research. While director Dr. Grisdale was called upon to act as Dominion field husbandman from 1911 to 1919 and Dominion botanist from 1917 to 1919.

In 1919, when the position of Deputy Minister of Agriculture for Canada became vacant, Dr. Grisdale was appointed and he has held this position since that time, as well as having been acting commissioner of agriculture.

Dr. Grisdale acted as advisor to the Canadian Government in London, England, in 1922, conferring with the British Ministry of Agriculture regarding regulations incidental to the lifting of the cattle embargo, also as agricultural advisor to the Canadian delegation at the 1923 and 1926 Imperial Conference in England. In 1927 Dr. Grisdale headed the Canadian delegation to the Imperial Research Conference in London, and in 1929 represented the Canadian Government on the Imperial Agricultural Bureau Research Council. He is a member of the Canadian Research Council and joint chairman of the council's committee on tuberculosis, as well as of a committee appointed to study the important question of cereal rust. Dr. Grisdale is a Fellow of the American Association for the Advancement of Science, of the American Genetic Association and of the Canadian Society of Technical Agriculturalists.

News Notes

M. and Mrs. S. B. Card and Booth were Lethbridge visitors on Saturday of last week.

Alvin Jones is getting his tables and everything ready to open his light lunch and refreshment stand in connection with his Bakery business in Stone's old Stand next to the Pharmacy.

Gordon Brewerton was a Raymond visitor on Sunday last.

Mrs. Thos. Allen and Mrs. A. W. Kirkham were in attendance at the U.F.W.A. Convention in Lethbridge on Saturday last.

Wheat fields all over the district are looking fine. Good healthy color, uniform stand and very satisfactory growth. Native grass is the only thing that really is in dire need of rain, and this is not hurting yet.

SUBSTITUTES IN POULTRY FEEDING

(Experimental Farms Note)

It is often desirable to substitute certain protein or carbohydrate foods by some food more easily obtained by reason of fluctuating prices or supplies. In feeding trials for egg production at the Dominion Experimental Station at Scott, Sask., the reduction of protein below a certain percentage, has reduced the egg production in a similar ratio.

Perhaps the most common source of protein in the average farm poultry ration is milk, but it is doubtful if the hen consumes sufficient milk to supply an adequate quantity of protein for good egg production. Satisfactory results have been obtained at Scott by using in the mash 20 per cent of beef scrap testing 50 per cent protein. This mash is kept before the birds in hoppers. In some parts of Canada, fish meal is cheaper than beef scrap and usually contains 60 per cent protein. A three-year test comparing beef scrap and fish meal for protein supplements, resulted in an increased egg production of four eggs per bird in favor of the fish meal. The quantity of the fish meal was reduced according to the greater protein content and no taste of fish meal was detected in the eggs as is sometimes feared. Skim-milk powder containing 33 per cent protein, fed in sufficient quantity to make the protein intake the same as in the beef scrap, gave a lower egg production by seven eggs per bird.

The standard laying mash for a number of years at the Scott Station was made up of equal parts by weight of bran, shorts, oat chop, barley chop, and beef scrap, with an addition of a pound of fine salt and two and a half pounds of fine charcoal per each hundred pounds of the mixture. More recently, a three year test has shown that the bran and shorts may be replaced by an equal weight of wheat

CANADIAN GARDEN SERVICE

KEEPING GARDEN TRIM

Even annual flowers will benefit from a little judicious trimming or pruning now and then. Many plants like the dahlia and zinnia set a great quantity of buds and if all of these are allowed to develop the flowers will not be very large. Some people make a practice of removing nearly all of these buds so as to have giant blossoms. For show purposes of course, only three or four per plant are allowed to open, but for averages purposes, if we remove a few of the buds only, we will get all the size required. With the very tall growing dahlias, we should trim the foliage and stems a little in order to get the desired shape. Some people trim to a single or main stem, like tomatoes. With the smaller growing annuals such as zinnias, cosmos, and marigolds we want just the opposite effect—business in order that the plant may be sturdy and resist heavy rains and winds. If when we transplant, or when the plant is a few weeks old, we remove the top of the main stem and the first buds we will encourage side growth and get that stocky and symmetrical plant we wish. Another thing to remember at this time is to remove all signs of fading blossoms. Once the flower is past its best nick it, or if the stems are short and the bloom numerous like alyssum or ohlox, shear it off. Otherwise seed pods will start to develop and when this stage is reached the plant will stop flowering altogether.

EASY WITH THE LAWN

As soon as the weather turns really hot, do not mow the lawn so often as you have been doing and set the machine so that it will not cut too close to the ground. Moreover, while clipping as a rule should always be left in the grass to form a mulch, it is absolutely essential just now. A lawn cut too often or too short is liable to be burned out by the sun. At this time, too, it is better in dry weather to give one good soaking every ten days rather than a daily sprinkle.

ROSE REQUIREMENTS

Roses require fairly deep cultivation and heavy fertilizing up until the first of July in order to push growth and produce flowers. After this, however, it is advisable to slow down so that the plants may get hardened before the cold weather sets in. To aid in this process, which takes two or three months, it is a good plan to plant a few low-growing plants such as pansies, Calceolarias, violas or dwarf nasturtiums, around the roses, which will brighten up the bed and benefit the bushes by absorbing moisture. At this time, a good quick-acting fertilizer is advised. After July, however, a slow-acting fertilizer such as liquid manure, or bone meal should be used.

News Notes

J. M. Workman, of Cardston was a business visitor in Raymond on Monday.

Reg Cooper was busy on Monday fixing up a couple of Softball diamonds on the Ball Park.

Mr. and Mrs. Wm. Cooper were in Raymond Sunday and visited Mr. and Mrs. Reg. Cooper and family here.

35 players were present at the Band Practice on Sunday last. The boys are getting along nicely.

The Provo School District are calling for tenders for a one-roomed frame school house. Read the ad. in this issue.

Several of the Public School Teachers are at the High School this week supervising Departmental examinations there.

Booth Card has received a Missionary Call to France in the European Mission and will leave for Salt Lake City about July 6th.

Mr. and Mrs. H. F. Allen Mr. and Mrs. C. E. Alfred, Mr. and Mrs. Paul Redd, Mr. and Mrs. C. R. Wing, Mrs. O. H. Snow, Mrs. Witbeck and Booth Card, all of the Raymond 1st Ward were at the Temple last Thursday evening.

Chop and the change has increased the average egg production by seven eggs per bird. All tests referred to above were for a six months period from November 1 to May 1 each year.

E. VAN NICE,

Dominion Experimental Station,
Scott, Sask.

Here and There

Pictou lobster fishermen are trying a new venture in shipping lobsters to Boston, Mass. Recently a carload valued at \$1,000 went through by express over Dominion Atlantic Railway lines to Yarmouth, being shipped thence to Boston.

Lovers of wild life will be glad to hear of the establishment of a second Bird Sanctuary in Canada, similar to that of Jack Miner, to be situated at Bird Haven Farm, by John W. Piggott, of Bridgetown, Nova Scotia. It will be located in the heart of the beautiful Annapolis Valley.

The first radio broadcast in history of musical entertainment from a steamship in motion, sent over a network of Canadian and United States land stations, was carried through successfully as the Empress of Britain was sailing up the St. Lawrence on her maiden voyage from Cherbourg June 1.

All records for the St. Lawrence route to Europe were shattered when the new Canadian Pacific liner Empress of Britain, 42,500-ton flagship of the company's Atlantic fleet, made the run from Cherbourg to Father Point in four days, nineteen hours, on her maiden voyage May 27-June 1.

"The train ride from Vancouver to Banff is the most wonderful I have ever taken," was the comment of the much-travelled and famous writer J. B. Priestley, of "Angel Pavement" and "The Good Companions" fame, interviewed recently at the Banff Springs Hotel. "These parts are too wonderful to describe," he said, and added he was coming again in September for the trail riding.

The Shield for efficiency among the four Canadian Pacific white Empresses of the Pacific, donated last year by E. W. Beatty, chairman and president of the company, was presented for the second time at Vancouver recently to Captain A. J. Hosken and the ship's company of the Empress of Russia. During the presentation the gathering was entertained by the broadcast from the Empress of Britain, over 3,000 miles away, steaming down the St. Lawrence.

Definite promise of an International travelling Art School with headquarters to be established at Banff in 1932, or at one of the Bungalow Camps in the Rockies, has been given by Tom Hull, prominent London, England, artist who has been assured by a number of his confreres in England that they would join him in artistic exploitation of the scenic wealth of the Canadian Rockies.

Travelling by Canadian Pacific special train from Toronto to Victoria and return, over 100 members of the Canadian Manufacturers' Association, held their annual general meeting early in June and took the opportunity to make a Trans-Canada tour, including Winnipeg, Regina and Saskatoon, where they conferred with local industrialists and were given civic and provincial welcomes. The meeting coincided with the 60th anniversary of the entrance of British Columbia into Confederation. (744)
